To Whom It May Concern

Re: Reference SysControl Secure

SysControl Secure has been known to me since December 2011 when the company was invited to tender for a CCTV solution upgrading the CCTV system at the main entrance as well as a solution for the 4.8 km perimeter fence.

After rigorous qualification, SysControl Secure was awarded the tender valued in excess of R3, 6 million and the phased installation of the systems commenced. The final phase is currently under way. During the most professional relationship, SysControl was also awarded various smaller projects and we entered service level agreements for the maintenance of the gate access systems and the perimeter electrified fence.

The company and staff has rendered a proficient, reliable and professional service at all time, including maintenance or breakdown assistance outside normal working hours and beyond the scope of their contractual obligations.

We have experienced no negative occurrences and as such can recommend their services without any hesitation.

Should you require any further information, please do not hesitate to contact me.

Regards
